For technical support, email [support@hammer-storage.com](mailto:support@hammer-storage.com).

Also available for  
**morespace™**  
Portable Hard Drive

**How to Apply the morespace™ External Hard Drive Skin**

- Remove the skin from the liner
- Apply your skin to a clean and dry surface
- Take precautions not to overstretch the skin while removing the backer
- Start applying the skin by aligning lengthwise, pushing out any bubbles first downwards and then to the sides
- Smooth out the skin as it adheres to the device
- If bubbles occur, gently peel back and smooth out any areas that may have bubbles or are misaligned
- These skins only protect the outside of the devices
- You can design your own skins at [skins.hammer-storage.com](http://skins.hammer-storage.com)

**Advantages:**

- Keep your external device scratch protected and dust free for a longer life
- Easy to apply and removes without residue
- A drive with a personalized skin makes a great holiday gift

**Art and photo prints for your device:**

The skins are made out of premium materials, with photo quality graphics, to keep the device looking new.

**For more information, please visit [skins.hammer-storage.com](http://skins.hammer-storage.com)**

Due to the unique printing process and the special materials used, the colors on the skin might not exactly match the colors on the artwork. A list of supported devices is on our website. Hammer skins are recommended for single use.
